NUCLEAR HOLOCAUST: WHO SHOULD SURVIVE?

Scenario: World War 3 has just occurred and you and 9 other people find yourselves to be the only people left on the earth. You manage to all make it to a bunker, however, you all realize that if 3 of you wish to survive for many years, 7 of you will have to leave soon because there are not enough resources for all of you to survive. If all of you stay, then you will all live only for a maximum of 2 years.

In your bunker, you have the following facilities:
- sewage system
- water
- seeds
- some clothes
- a few books
- some medical facilities but no operating material
- a greenhouse

In your group of ten, each of you has a chance to speak. You must present your case. Explain why you think you should live. Argue for your life unless you really want to sacrifice for others. Listen to others arguments as well.

In the bunker, the following roles will be played out. Each person in the group of ten will play one of the following roles.

a. engineer
b. priest
c. hippy and drug addict
d. a single pregnant woman with a 5 year old girl (count as one person)
e. an army officer who has mental instability of some sort but is useful nonetheless
f. an elderly woman
g. a disabled person
h. lawyer
i. a homeless person
j. doctor

You have ten to fifteen minutes as a group, to:

- allow each person to speak
- decide whether some will leave and the others stay
- decide who will leave and who will stay

When that is complete, you are to answer the following question. You only have to answer the questions for the character you chosen. Answer is due at the end of the class.
Your name:

**REASONS FOR YOUR DECISION**: Choose only one character and explain reasons to keep alive or to sacrifice

Characters: DOCTOR, ENGINEER, PRIEST, HIPPY ADDICTED TO DRUGS, SINGLE WOMAN PREGNANT WITH A CHILD, ARMY GENERAL WITH PSYCHIATRIC PROBLEMS, ELDERLY WOMAN, DISABLED PERSON, LAWYER, HOMELESS PERSON
