Agilent 33120A
Function/Arbitrary Waveform Generator

Data Sheet

Uncompromising performance
for standard waveforms
The Agilent Technologies 33120A Function/Arbitrary Waveform Generator uses direct digital-synthesis techniques to create a stable, accurate output signal for clean, low-distortion sine waves. It also gives you fast rise- and fall-time square wave, and linear ramp waveforms down to 100 µHz.

Custom waveform generation
Use the 33120A to generate complex custom waveforms such as a heartbeat or the output of a mechanical transducer. With 12-bit resolution, and a sampling rate of 40 MSa/s, the 33120A gives you the flexibility to create any waveform you need. It also lets you store up to four 16,000-deep waveforms in nonvolatile memory.

Easy-to-use functionality
Front-panel operation of the 33120A is straightforward and intuitive. You can access any of ten major functions with a single key press or two, then use a simple knob to adjust frequency, amplitude and offset. To save time, you can enter voltage values directly in Vp-p, Vrms or dBm.

Internal AM, FM, FSK and burst modulation make it easy to modulate waveforms without the need for a separate modulation source. Linear and log sweeps are also built in, with sweep rates selectable from 1 ms to 500 s. GPIB and RS-232 interfaces are both standard, plus you get full programmability using SCPI commands.

Optional phase-lock capability
The Option 001 phase lock/TCXO timebase gives you the ability to generate synchronized phase-offset signals. An external clock input/output lets you synchronize with up to three other 33120As or with an external 10-MHz clock.

Option 001 also gives you a TCXO timebase for increased frequency stability. With accuracy of 4 ppm/yr, the TCXO timebase make a 33120A ideal for frequency calibrations and other demanding applications.

With Option 001, new commands let you perform phase changes on the fly, via the front panel or from a computer, allowing precise phase calibration and adjustment.

Link the Agilent 33120A to your PC
The included Agilent IntuiLink software allows you to easily create, edit, and download complex waveforms using the IntuiLink Arbitrary Waveform Editor. Or you can capture a waveform using IntuiLink Oscilloscope or DMM and send it to the 33120A for output. For programmers, ActiveX components can be used to control the instrument using SCPI commands. IntuiLink provides the tools to easily create, download, and manage waveforms for your 33120A. To find out more about IntuiLink, visit www.agilent.com/find/intuilink.

The 33120A can also be used in conjunction with the 34811A BenchLink Arb software. This Windows®-based program lets you create and edit waveforms on your PC and download them to the 33120A.

3-year warranty
With your 33120A, you get operating and service manuals, a quick reference guide, test date, and a full 3-year warranty, all for one low price.

• 15 MHz sine and square wave outputs
• Sine, triangle, square, ramp, noise and more
• 12-bit, 40MSa/s, 16,000-point deep arbitrary waveforms
• Direct digital synthesis for excellent stability
Waveforms

Standard
- Sine, square, triangle, ramp, noise, sin(x)/x, exponential rise, exponential fall, cardiac, dc volts.

Arbitrary
- Waveform length: 8 to 16,000 points
- Amplitude resolution: 12 bits (including sign)
- Sample rate: 40 MSa/s
- Non-volatile memory: Four (4) 16,000 waveforms

Frequency Characteristics

<table>
<thead>
<tr>
<th>Waveform</th>
<th>Parameters</th>
</tr>
</thead>
<tbody>
<tr>
<td>Sine</td>
<td>100 µHz - 15 MHz</td>
</tr>
<tr>

<td>100 µHz - 100 kHz</td>
</tr>
<tr>
<td>Ramp</td>
<td>100 µHz - 100 kHz</td>
</tr>
<tr>
<td>White noise</td>
<td>10 MHz bandwidth</td>
</tr>
</tbody>
</table>

Resolution: 10 µHz or 10 digits

Accuracy: 10 ppm in 90 days, 20 ppm in 1 year, 18°C - 28°C

Temp. Coeff: < 2 ppm/°C

Aging: < 10 ppm/yr

Sinewave Spectral Purity

Harmonic distortion:
- DC to 20 kHz: -70 dBc
- 20 kHz to 100 kHz: -60 dBc
- 100 kHz to 1 MHz: -45 dBc
- 1 MHz to 15 MHz: -35 dBc

Spurious (non-harmonic):
- DC to 1 MHz: < -65 dBc
- 1 MHz to 15 MHz: < -65 dBc + 6 dB/octave

Total harmonic distortion: DC to 20 kHz < 0.04%

Phase noise: < 55 dBc in a 30 kHz band

Signal Characteristics

Squarewave
- Rise/Fall time: < 20 ns
- Overshoot: 4%
- Asymmetry: 1% + 5ns
- Duty cycle: 20% to 80% (to 5 MHz) 40% to 60% (to 15 MHz)

Triangle, Ramp, Arb
- Rise/Fall time: 40 ns (typical)
- Linearity: < 0.1% of peak output
- Setting Time: < 250 ns to 0.5% of final value
- Jitter: < 25 ns

Output Characteristics

Amplitude (into 50Ω)
- 50 mVpp - 10 Vpp
- ± 1% of specified output

Flatness (sinewave relative to 1 kHz)
- < 100 kHz: ± 1% (0.1 dB)
- 100 kHz to 1 MHz: ± 1.5% (0.15 dB)
- 1 MHz to 15 MHz: ± 2% (0.2 dB) Ampl ≃ 3Vrms
- ± 3.5% (0.3 dB) Ampl < 3Vrms

Output Impedance
- 50Ω (fixed)

Offset (into 50Ω)
- + 5 Vpk ac + dc
- ± 2% of setting + 2 mV

Resolution
- 3 digits, amplitude and offset

Modulation

AM
- Carrier -3dB Freq.: 10 MHz (typical)
- any internal waveform including Arb
- Frequency: 10 MHz - 20 kHz
- Depth: 0% - 120%
- Source: Internal/External

FM
- Modulation: any internal waveform including Arb
- Frequency: 10 MHz - 10 kHz
- Deviation: 10 MHz - 15 MHz
- Source: Internal only

FSK
- Internal rate: 10 MHz - 50 kHz
- Frequency Range: 10 MHz - 15 MHz
- Source: Internal/External (1 MHz max.)

Burst
- Carrier Freq.: 5 MHz max.
- Count: 1 to 50,000 cycles or infinite
- Start Phase: -360° to +360°
- Internal Rate: 10 MHz - 50 kHz ± 1%
- Gate Source: Internal/External Gate
- Trigger: Single, External or Internal Rate

Sweep

Type
- Linear or Logarithmic

Direction
- Up or Down

Start F/Stop F
- 10 MHz - 15 MHz

Speed
- 1 ms to 500 s ± 0.1%

Trigger
- Single, External, or Internal

Rear Panel Inputs
- Ext. AM Modulation: ± 5 Vpk = 100% modulation
- FSK/Burst Gate: 5kΩ input resistance
- TTL low true

System Characteristics

Configuration Times
- Function Change: 80 ms
- Frequency Change: 30 ms
- Amplitude Change: 30 ms
- Offset Change: 10 ms
- Select User Arb: 100 ms
- Modulation Parameter Change: < 350 ms

Ordering Information

33120A Function/Arbitrary Waveform Generator

Accessories included
Operating manual, service manual, quick reference guide, IntuiLink connectivity software, test data, and power cord

Options
- Opt. 001 Phase lock/TCXO timebase
- Opt. 106 BenchLink Arb software (34811A)
- Opt. 1CM Rack Mount Kit (34190A)*
- Opt. W50 Additional 2-year warranty (5-year total)
- Opt. 910 Extra manual set

Manual language options (please specify one)
- ABA US English
- ABD German
- ABE Spanish
- ABF French
- ABJ Japanese
- ABZ Italian
- ABO Taiwan Chinese
- AB1 Korean

Accessories
- Agilent 34161A Accessory pouch
- Agilent 34811A BenchLink Arb software

*For racking two side-by-side, order both items below
- Lock-link Kit (P/N 5061-9694)
- Flange Kit (P/N 5063-9212)

Agilent Technologies’ Test and Measurement Support, Services, and Assistance
Agilent Technologies aims to maximize the value you receive, while minimizing your risk and problems. We strive to ensure that you get the test and measurement capabilities you paid for and obtain the support you need. Our extensive support resources and services can help you choose the right Agilent products for your applications and apply them successfully. Every instrument and system we sell has a global warranty. Support is available for at least five years beyond the production life of the product. Two concepts underlie Agilent’s overall support policy: “Our Promise” and “Your Advantage.”

Our Promise
Our Promise means your Agilent test and measurement equipment will meet its advertised performance and functionality. When you are choosing new equipment, we will help you with product information, including realistic performance specifications and practical recommendations from experienced test engineers. When you use Agilent equipment, we can verify that it works properly, help with product operation, and provide basic measurement assistance for the use of specified capabilities, at no extra cost upon request. Many self-help tools are available.

Your Advantage
Your Advantage means that Agilent offers a wide range of additional expert test and measurement services, which you can purchase according to your unique technical and business needs. Solve problems efficiently and gain a competitive edge by contracting with us for calibration, extra-cost upgrades, out-of-warranty repairs, and on-site education and training, as well as design, system integration, project management, and other professional engineering services. Experienced Agilent engineers and technicians worldwide can help you maximize your productivity, optimize the return on investment of your Agilent instruments and systems, and obtain dependable measurement accuracy for the life of those products.

By internet, phone, or fax, get assistance with all your test & measurement needs
