Quiz 2. The massless, 4 - ft wide gate shown in the right figure pivots about the frictionless hinge 0 . The water depth $h$ is 6 ft .
(a) Find the resultant pressure force $F_{R}$ acting on the gate. Use $\gamma=$ $62.4 \mathrm{lb} / \mathrm{ft}^{3}$ for water.
(b) Find the location of center of pressure $y_{R}$. (Hint: $I_{x c}=b h^{3} / 12$, where $b$ is the gate width)
(c) Determine the counterweight $W$ that holds the gate in place.
(Hint: Consider the equilibrium of the moment about point 0 )

Note: Attendance (+2 points), Format (+1 point)
