Midterm Exam Discussion

Categories of Exams
1. Algorithms and custom programs
2. Algorithms and public software
3. Solution procedure

Common Flaws
- Lack of ‘road map’
- Lack of algorithm and code generalization
- Jumps in the solution procedure
- The steps of the algorithm not synchronized with the implementation

Perfect Exam
- Table of contents (road map)
- The algorithm (steps specified)
- Customized software (source code and compiled versions attached)
- Software manual
- ‘Manual steps’ of the solution procedure
- Solution generated by the algorithm

Perfect Exam
