## QUIZ 3 - Report

## General

| Total number of students | 42 |
| :--- | :--- |
| Attended | 40 |
| Missed | 2 |
| Average grade | 7.23 |
| Standard deviation of grades | 2.07 |

## Grade distribution

## Comparison with last five years

## Grade history

## Attendance history

## Comments

- $17.5 \%$ of students did not apply correctly the continuity equation. Some used conservation of volume flow rate (ignoring the change in density), some applied Bernoulli equation.
- $30 \%$ of students did not consider the fuel flow rate in the continuity equation.
- $12.5 \%$ of students did not consider the net force on section 1 given by $\mathrm{P}_{1} \mathrm{~A}_{1}$.
- $35 \%$ of students did consider the net force but used absolute pressure instead of gage pressure.
- $12.5 \%$ of students used one value of mass flow rate on the right hand side of momentum equation instead of

$$
\dot{m}_{2} V_{2}-\dot{m}_{1} V_{1}
$$
