## Quiz 3 Report <br> 9/22/2023

## 1. Summary

| Total number of students | 8 |
| :--- | :--- |
| Attended | 8 |
| Missed | 0 |
| Average grade | 8.56 |
| Standard deviation of grades | 0.86 |

## 2. Comments

- Four students considered the area of the sheet to be circular, instead of calculating the area per unit depth. This caused the solution for the flowrate to be numerically wrong.
- Two students had a sign mistake in the momentum equation for the outlet sections.
- One student made a mistake in the continuity equation, assuming the flowrate at Section1 to be the same as in Sections 2 and 3, i.e., $Q_{1}=Q_{2}=Q_{3}$, whereas $Q_{1}=$ $Q_{2}+Q_{3}$
