# Flow around Clark-Y airfoil: Summary of EFD benchmark data and comparison with IIHR EFD data and CFD solution 

## Nobuaki Sakamoto, J. Colin Johnson, Stuart Breczinski, Marian V. Muste and Frederick Stern IIHR-Hydroscience\&Engineering, The University of Iowa

1. EFD benchmark data
[1] Jacobs E.N., Stack J., and Pinkerton R.M., 1930 Airfoil pressure distribution investigation in the variable density wind tunnel, Langley Memorial Aeronautical Laboratory Report No. 353
[2] Marchman J.F. and Werme T.D., 1984 Clark-Y airfoil performance at low Reynolds numbers, In: proc. AIAA $22^{\text {nd }}$ Aerospace Science Meeting, Jan. 9-12, Reno, Nevada, U.S.A.
[3] SILVERSTEN A., 1934, Scale effect on Clark-Y airfoil characteristics from NACA full-scale wind-tunnel tests, Langley Memorial Aeronautical Laboratory Report No. 502
[4] Zimmerman C.H., Characteristics of Clark-Y airfoils of small aspect ratios, 1932, Langley Memorial Aeronautical Laboratory Report No. 431

The summary of EFD benchmark data is given in Table 1.

Table 1 Summary of EFD benchmark data

2. Trend of each data set
2.1 Reference [1]

Fig. 1 Trend of $C_{L}$ in Reference [1]

Fig. 2 Trend of $C_{p}$ in Reference [1]

### 2.2 Reference [2]

Fig. 3 Trend of $C_{L}, C_{D}$, and $C_{L} / C_{D}$ with variations of Re in Reference [2]
(a) $C_{L}$ vs $\alpha$, (b) $C_{D}$ vs $\alpha$, (c) $C_{L} / C_{D}$ vs $\alpha$

Fig. 4 Re dependency of $C_{L \max }, C_{D \max }$ and $\alpha_{\max }$ in Reference [2]: (a) $C_{L \max }, C_{D \max }$ vs $R e,(b) \alpha_{\max }$ vs Re

Fig. 5 Trend of $C_{p}$ in Reference [2]

### 2.3 Reference [3]

Fig. 6 Trend of $C_{L}, C_{D}$, and $C_{L} / C_{D}$ with variations of $R e$ in Reference [3]
(a) $C_{L}$ vs $\alpha,(b) C_{D}$ vs $\alpha$, (c) $C_{L} / C_{D}$ vs $\alpha$

Fig. 7 Re dependency of $C_{L \max }$ and $\alpha_{\max }$ for $C_{L}$ in Reference [3]: (a) $C_{L \max }$ vs $\operatorname{Re}$, (b) $\alpha_{\max }$ vs $\operatorname{Re}$

### 2.4 Reference [4]

Fig. 8 Trend of $C_{L}, C_{D}$, and $C_{L} / C_{D}$ with variations of $A R$ in Reference [4]
(a) $C_{L}$ vs $\alpha,(b) C_{D}$ vs $\alpha$, (c) $C_{L} / C_{D}$ vs $\alpha$

Fig. 9 Aspect ratio dependency of $\mathrm{C}_{\mathrm{L} \max }$ and $\alpha_{\max }$ for $\mathrm{C}_{\mathrm{L}}$ in Reference [4]: (a) $\mathrm{C}_{\mathrm{Lmax}}$ vs AR, (b) $\alpha_{\max }$ vs AR
3. Comparison between the reference experimental data
3.1 $C_{L}$ vs $\alpha$ with largest AR

Fig. $10 C_{L}$ vs $\alpha$ with largest $A R$ : (a) $\operatorname{Re}=O\left(10^{5}\right)$, (b) $\operatorname{Re}=O\left(10^{6}\right)$
$3.2 C_{D}$ vs $\alpha$ with largest AR

Fig. $11 C_{D}$ vs $\alpha$ with largest AR: (a) $\operatorname{Re}=O\left(10^{5}\right)$, (b) $\operatorname{Re}=O\left(10^{6}\right)$
3.3 $C_{L} / C_{D}$ vs $\alpha$ with largest AR

Fig. $12 \mathrm{C}_{\mathrm{D}}$ vs $\alpha$ with largest AR: (a) $\mathrm{Re}=\mathrm{O}\left(10^{5}\right)$, (b) $\mathrm{Re}=\mathrm{O}\left(10^{6}\right)$
3.5 $\mathrm{C}_{\mathrm{Lmax}}, \mathrm{C}_{\mathrm{Dmax}}$ and $\alpha_{\max }$ with largest AR

Fig. 13 Re dependency for $C_{L \max }, C_{D \max }$ and $\alpha_{\max }$ : (a) $C_{L \max }, C_{D \max }$ vs $\operatorname{Re}$, (b) $\alpha_{\max }$ vs $\operatorname{Re}$
$3.4 C_{p}$ with largest AR

Fig. $14 C_{p}$ distribution with largest AR: (a) $\alpha \approx 0 \mathrm{deg}$, (b) $\alpha \approx 4 \mathrm{deg}$, (c) $\alpha \approx 7 \mathrm{deg}$, (d) $\alpha \approx 13 \mathrm{deg}$
4. Comparison with Flowlab simulation results

### 4.1 C L VS $\alpha$

Fig. $15 C_{L}$ vs $\alpha$ with largest $A R$, Flowlab solutions added: (a) $\operatorname{Re}=O\left(10^{5}\right)$, (b) $\operatorname{Re}=O\left(10^{6}\right)$

Fig. $16 C_{D}$ vs $\alpha$ with largest $A R$, Flowlab solutions added: (a) $\operatorname{Re}=O\left(10^{5}\right)$, (b) $\operatorname{Re}=O\left(10^{6}\right)$
4.3 $C_{L} / C_{D}$ vs $\alpha$

Fig. $17 C_{D}$ vs $\alpha$ with largest $A R$, Flowlab solutions added: (a) $\operatorname{Re}=O\left(10^{5}\right)$, (b) $\operatorname{Re}=O\left(10^{6}\right)$
4.3 $\mathrm{C}_{\mathrm{p}}$ with largest AR

Fig. 18 C distribution with largest AR, Flowlab solutions added
(a) $\alpha \approx 0 \mathrm{deg}$, (b) $\alpha \approx 4 \mathrm{deg}$, (c) $\alpha \approx 7 \mathrm{deg}$, (d) $\alpha \approx 13 \mathrm{deg}$
5. Comparison between EFD benchmark data and IIHR experimental data
$5.1 C_{\mathrm{L}}$ vs $\alpha$

Fig. $19 C_{L}$ vs $\alpha$, IIHR EFD data added: (a) large AR ( $\geq 5.75$ ), (b) small AR ( $1.5 \leq A R \leq 3$ )

Fig. $20 C_{D}$ vs $\alpha$, IIHR EFD data added: (a) large AR ( $\geq 5.75$ ), (b) small AR ( $1.5 \leq \operatorname{AR} \leq 3$ )
$5.3 C_{p}$

Fig. $21 C_{p}$ distribution, IIHR EFD data added: (a) $\alpha \approx 0 \mathrm{deg}$, (b) $\alpha \approx 16 \mathrm{deg}$
6. Comparison between EFD benchmark data, IIHR experimental data and Flowlab solution 6.1 $C_{L}$ and $C_{D}$ vs $\alpha$

Fig. $22 C_{L}$ and $C_{D}$ vs $\alpha$ : (a) $C_{L}$, (b) $C_{D}$
$6.2 C_{P}$

Fig. $23 \mathrm{C}_{\mathrm{p}}$ distribution: (a) $\alpha \approx 0 \mathrm{deg}$, (b) $\alpha \approx 16 \mathrm{deg}$
7. Discussion and Conclusion (To be added.)
